

15 Day Report Part-2

1. What tools are you using for making the project for example: eclipse, jframe, etc?

We are using VScode for making our project

2. Have you made any changes to the data structure you have selected?
If yes then why?

we are going forward with same data structured selected What tools

3. What is the progress of your project? What all have you accomplished in these 2 weeks?

We are done with the implementation of two data structures and trying to implement 1 more data structures in the project.

4. Did you face any problems in these 15 days and were you able to resolve them?

Our biggest problem was time management because there are other assignments, mini projects, hackathons going on. As we divided the work among four of us we overcome that issue as well.

5. Is the mentor helping you as and when required?

Yes, our mentor is helping us whenever required. She is guiding us in making the efficiency of our code more optimized.

6. How have the discussions with your mentor helped you?

Our discussion with our mentor helped us a lot.

Initially we had 3-4 ideas. She helped us in selecting one of them.

We wanted to build our project on graph using a priority queue. She guided us how we could do that and incorporate the use of tree data structure as well.

Want output should be expected explained by her to us.
